CHRONIC CONDITIONS

Name	Description
Hyperthyroidism	A condition that occurs when the thyroid gland makes more thyroid hormones than the body needs.
Migraine	A migraine is a headache that can cause severe throbbing pain or a pulsing sensation, usually on one side of the head. It's often accompanied by nausea, vomiting, and extreme sensitivity to light and sound.
Sciatica	Sciatica is a debilitating condition that is a result of the sciatic nerve or sciatic nerve root pathology. Sciatica pain often is worsened with twisting, bending, or coughing.
Asthma	Asthma is a chronic lung disease affecting people of all ages. Symptoms can include coughing, wheezing, shortness of breath and chest tightness.
